PROFILE

I'm a British/Scottish self-taught freelance web developer specialising in back-end PHP code, and a self-taught securities investor/trader. I consider myself to be a skilled developer and something of an armchair economist. I enjoy executing on new ideas and solving complex problems and this reflects most in my development work. I am an inquisitive person who likes to learn about and get a grasp of new concepts and ideas. I am also proficient in video editing, photoshop, audio editing and manipulation, desktop computer hardware assembly, computer drive formatting and varied OS installation, intermediate networking such as management of port connections between network nodes to manage FTP and SSH clients/servers or to facilitate many server processes for webapp development or otherwise with internal network servers, and much more.

I attended Larbert High School from August 2015 to June 2021, a full high school term first through sixth year. I also attended Forth Valley College between August 2019 and June 2020. In my time at both I accrued various qualifications and units varying between levels 4-7 on the SCQF scale with a total aggregated 406 SCQF Credit Points.

EDUCATION

Forth Valley College

AUGUST 2019 – JUNE 2020

Studied Computing and was awarded an SCQF Level 7 Higher National Unit in 'Professionalism and Ethics in Computing'
